## CAREER OBJECTIVE

Motivated and detail-oriented professional with a background in the US healthcare BPO industry and a strong passion for web development. Currently building skills in full stack development with hands-on experience in HTML, CSS, JavaScript, and modern frameworks like React.js and Node.js. Quick learner with excellent communication skills, a strong work ethic, and the ability to adapt to new technologies. Eager to contribute to real-world projects and grow in a dynamic tech environment.

## PROJECTS

### 1. Personal Portfolio Website - Tech Stack: HTML5, CSS3

A responsive and visually appealing personal portfolio website to showcase my web development skills and projects.

- Designed and developed the entire website layout using HTML5 AND CSS3.
- Built a clean, mobile-responsive UI using CSS grid and CSS Flexbox and media queries.
- Included sections like About, Skills, Projects, and Contact to reflect personal branding.
- Styled navigation bar and implemented smooth transitions between sections.
- Deployed using GitHub pages for public accessibility.

Live Demo: <https://jayajo5.github.io/Portfolio-Website>

### 2. Simon Game (Memory Game) - Tech Stack: HTML5, CSS3, JavaScript (jQuery) [DOM, Events, Logic]

A classic color-sequence memory game where players repeat an increasingly long pattern of color to score points.

- Developed interactive game logic using jQuery to generate random sequence and track user input.
- Used DOM manipulation to animate button presses and provide visual/audio feedback.
- Implemented game start, level tracking, user input validation, and reset functionality.
- Enhanced user experience with sounds, transitions, and responsive design.
- Deployed using GitHub pages.

Live Demo: <https://jayajo5.github.io/Simon-Game-Challenge/>

### 3. mini-Calculator web app - Tech Stack: HTML5, CSS3, JavaScript, Math.js

A functional web-based calculator that performs basic arithmetic operations like addition, subtraction, multiplication, division, and percentage.

- Designed a responsive and clean user interface using HTML and CSS.
- Implemented calculator logic using JavaScript to process user input and perform real-time calculations.
- Integrated Math.js library for safer and more accurate expression evaluation.
- Used DOM manipulation and event listener to dynamically update the display based on button clicks.
- Deployed the project using GitHub pages for public access.
